Overhead & In-Floor Conveyor Systems

Power & Free (P&F) allows for multiple routes, in-line stops and interface with both manual and automatic production operations. BOJAK Enclosed Track & I-Beam conveyors offer economical solutions for single path applications.

Aluminum, Stainless & Steel Conveyors

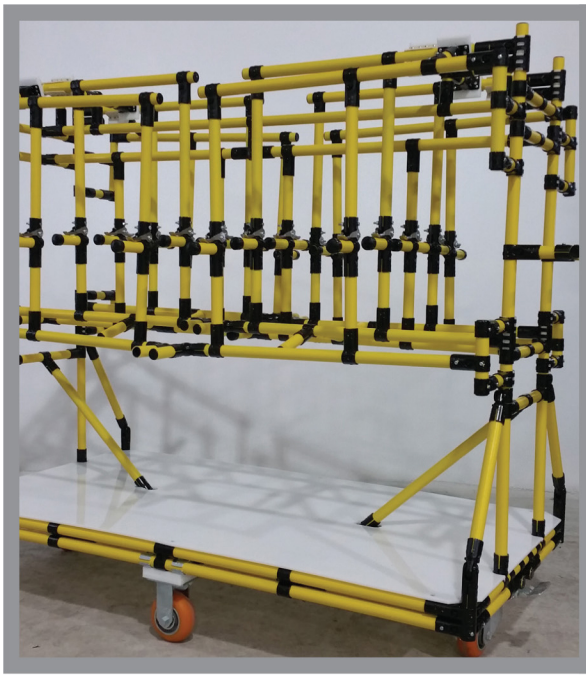
Ideal for moving products through assembly operations, product transport and custom material handling systems. BOJAK offers numerous pallet designs, conveying and load handling options.

Automatic Trailer Load & JIT Systems

Automatic Trailer Load/Unload, Sequencing and Shipping Systems ensure fast and cost efficient JIT parts delivery. BOJAK offers turn key systems for loads ranging from several hundred to 6,000 lbs. per rack.

Automatic Guided Vehicles

AGV's provide a flexible and cost-effective solution ideal for moving products through assembly operations or transport of finished and in-process goods throughout your plant or warehouse.

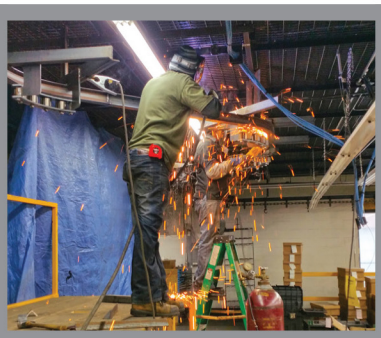


Modular Kitting Systems

Light weight, reconfigurable, easy to assemble and designed for 24/7 industrial use; these systems are cost effective alternatives for custom material handling carts, flow racks and work stations.

Intelli-Move™ Smart Series Conveyors

Stainless steel conveyors designed for package handling, wash down, sanitary and food grade operations. Available with multiple belting, product guides and support options.



Installation & Commissioning Services

From turn key systems to conveyor upgrades, repair and maintenance, our team understands the tight deadlines of a shutdown. We work with you to ensure installations are completed on time and to your expectations.

Build To Print Manufacturing Services

BOJAK provides precision machining, parts prototyping and build to print services. Our rigid quality assurance programs and procedures are strictly enforced from receipt of order through to shipping.
